## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-23, drawn to DNA constructs comprising a phytoene synthase derived from a plant and a phytoene desaturase derived from a bacteria for expression in plant cells.

Group II, claim(s) 24-30, drawn to a method of transforming plants cells with DNA encoding a phytoene synthase from bacteria and phytoene desaturase from fungi.

The special technical feature of Group I appears to be the expression cassettes recited in Claim 1, which are capable of directing expression of 2 or three particular combinations of enzymes, wherein the source of the coding sequence for phytoene synthase is either plant or fungal. The sequences of these combinations are not shared with the combinations of expression of the cassettes of Claim 24 of Group II, wherein the source of the coding sequence for phytoene synthase is bacterial and hence the sequence is not the same.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
